

The minimum qualification requirement is a degree in BBA, BCA, MCA or MBA.

The exam is online-based having a multiple-choice questions format with 60 questions in total. The test lasts for about 90 minutes. The percentage passing score is 68%, which is a minimum score for all candidates.

However, it is quite normal to find one or two candidates who may fail to attain the minimum passage score of 68%. This should not worry you as you can retake the examination and attain your desired certification. Candidates, who wish to re-sit the test, must resubmit their registration details together with a re-take fee of \$100.

The candidate has to register through [Webassessor](#) and can apply for the exam

Payment details:-

The candidate will be asked for the payment at the time of exam scheduling and once he is confirmed for the exam the candidate will be asked to give the details of credit or debit card for the payment of \$200(first time) or \$100(re-take).

If your score is less than passing score you will receive a result as fail. You can give the three attempts for one exam.

If you do not pass in three attempts you will have to wait for one year before taking the exams again.

The cost of exam retake is USD 100

Below is the retake policy for Salesforce multiple-choice certification exams. If you fail your first attempt, you can schedule your next attempt through your Webassessor test taker account the day after receiving the results of your exam. The earliest you can schedule a retake is the next day; we do not allow same-day retakes. The cost to retake an exam is 50% of its original price per retake and Webassessor will automatically adjust the cost to the retake price.

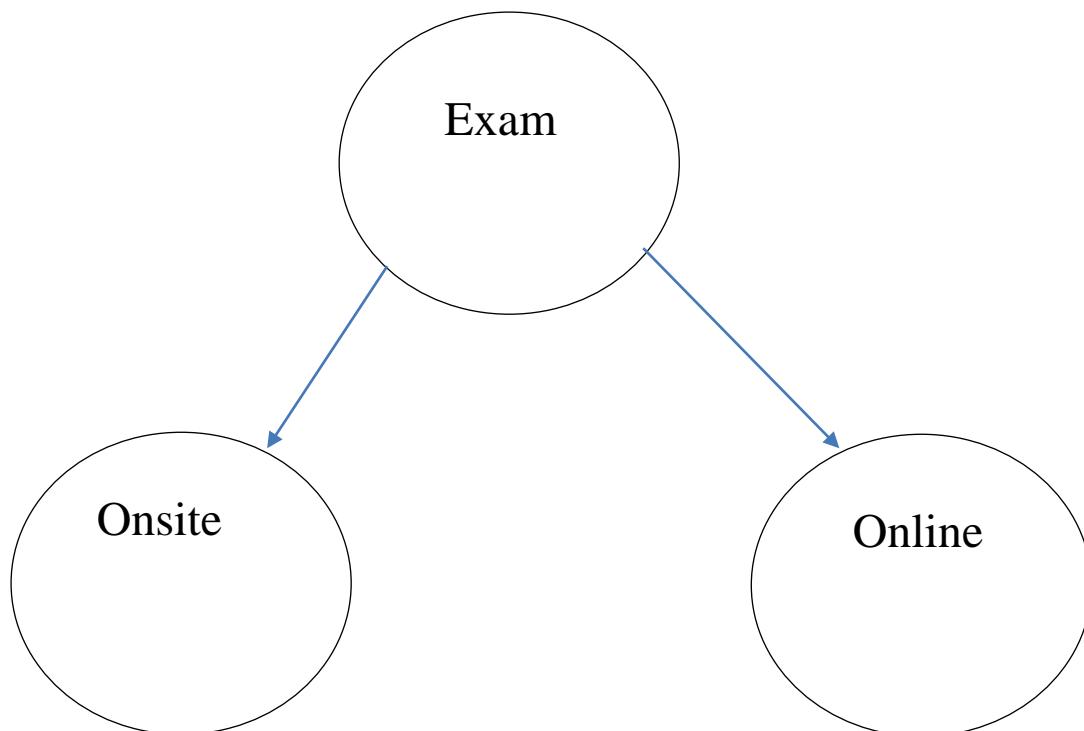

Note: Certification exams are taxable per local laws. Kryterion will collect taxes in Webassessor at the time of registration.
